

「 Chinese Society of Tropical Medicine and Parasitology 」

26 September 2009

**Dr. Jae-Sook Ryu**

Department of Environmental Biology and Medical Parasitology  
Hanyang University College of Medicine  
Seoul 133-791, Korea

Dear President Jae-Sook Ryu,

I am very glad to learn that the 50th anniversary of the foundation of the Korean Society for Parasitology (KSP) is coming. On behalf of all the members of the Chinese Society of Tropical Medicine and Parasitology (CSTMP), I would like to express my sincere congratulation for the celebration of the foundation and my warm greeting to you and all the KSP members.

It is well known that the KSP is a powerful society. She has gained a great achievement of the control of numerous parasitic diseases in Korea, as well as in the parasitological researches in the last half century. She also showed her great capacity of organization for successful holding the 17th International Congress for Tropical Medicine and Malaria at the beautiful Jeju island in 2008.

I am sure the friendship between the CSTMP and The KSP will become longer and longer!

Sincerely yours,

**Si Qi Lu, M.D., M.P.H.**
